

HOW TO UPDATE THE SCOREBOARD

A step-by-step guide for league admins. Takes about five minutes each week. No technical knowledge needed.

BEFORE YOU START

You need three things. Get these ready before you sit down:

WHAT	WHERE IT COMES FROM
The cricket file	Exported from DartConnect. A <code>.csv</code> file.
The '01 file	Also exported from DartConnect. Also a <code>.csv</code> file.
The admin passcode	Ask whoever set up the site. It is the same one every week.

You cannot break anything. Nothing goes on the public scoreboard until you press the **Publish** button at the very end. Everything before that is just you looking at it. And even after publishing, any earlier week can be put back with one click.

1

STEP ONE

SIGN IN

Go to **smartdart.net/bcda/admin** in any web browser, on a phone or a computer. Type the passcode and press **Sign in**.

SIGN IN

PASSCODE

Admin passcode

SIGN IN

Sessions last 8 hours. [View the public scoreboard](#)

The sign-in screen. The passcode shows as dots as you type — that is normal.

Once you sign in you stay signed in for **8 hours**. If you come back the next day you will be asked for the passcode again.

2

STEP TWO

SAY WHICH BOARD THIS IS

1. Type the **season** name, for example `Winter/Spring 2026`.
2. Tap the **league**: Singles, Doubles or Teams.

The screenshot shows a form titled "STEP 1 WHICH BOARD IS THIS?". It has two sections: "SEASON" and "LEAGUE". The "SEASON" section has a text input field containing "Winter/Spring 2026". The "LEAGUE" section has three buttons: "SINGLES" (highlighted in green), "DOUBLES", and "TEAMS".

Type the season the same way every week, exactly. Players see this name on the scoreboard.

Spelling matters here. If you type `Winter/Spring 2026` one week and `Winter Spring 2026` the next, the site treats them as two different seasons and you will end up with two separate boards. After the first week, the season name appears in a dropdown — pick it from there instead of retyping it.

3

STEP THREE

ADD THE TWO FILES

Drag both `.csv` files from your computer onto the big dashed box. Or click the box to browse for them.

STEP 2

DROP THE TWO EXPORTS

DROP THE CRICKET AND '01 CSVS HERE

Either order — each file is identified by its own columns. Or click to browse.

CRICKET
Nothing yet

'01
Nothing yet

CLEAR

PROCESS

Before: the drop area is empty and both slots say “Nothing yet”.

When the files land, each one drops into the correct slot on its own and the boxes turn green. **The order does not matter** — the site works out which file is which by looking inside them.

STEP 2

DROP THE TWO EXPORTS

DROP THE CRICKET AND '01 CSVS HERE

Either order — each file is identified by its own columns. Or click to browse.

CRICKET
BCDAS_Winter_Spring_2026_all_cricket_leaderboard.csv

'01
BCDAS_Winter_Spring_2026_all_01_leaderboard.csv

CLEAR

PROCESS

After: both slots are green and show the file names. Now press **Process**.

Dropped the wrong file? Press **Clear** and start the step again. If you drop something that is not a DartConnect export, the site tells you so and ignores it.

4

STEP FOUR

CHECK IT BEFORE IT GOES OUT

Pressing **Process** shows you what the scoreboard *would* look like. Nothing is public yet. Read the row of numbers along the top:

VIEW SCOREBOARD

SIGN OUT

NUMBER	WHAT IT MEANS
Players	How many people are in the files. Does it look about right?
Divisions	Which divisions were found, usually A and B.
New	People who were not on the board last week.
Changed	People whose total moved since last week.
Warnings	Things worth a look. Not errors. See below.

Underneath is every player and their totals, so you can scan for anything odd.

STEP 1

WHICH BOARD IS THIS?

SEASON

Winter/Spring 2026

LEAGUE

SINGLES

DOUBLES

TEAMS

STEP 2

DROP THE TWO EXPORTS

DROP THE CRICKET AND '01 CSVS HERE

Either order — each file is identified by its own columns. Or click to browse.

CRICKET

BCDAS_Winter_Spring_2026_all_cricket_leaderboard.csv

'01

BCDAS_Winter_Spring_2026_all_01_leaderboard.csv

CLEAR

PROCESS

The full preview. The **vs live** column on the right shows what changed since last week.

5

STEP FIVE

PUBLISH IT

Happy with it? Press the orange button. The public scoreboard updates within seconds.

That is the whole job. You can close the page.

Want to check? Open smartdart.net/bcda/scoreboard, or press **View scoreboard** at the top of the admin page.

IF SOMETHING LOOKS WRONG

WARNINGS

A warning is the site telling you something it could not work out on its own. It does not stop you publishing.

STEP 1	
WHAT IT SAYS	WHAT TO DO
No gender in the export	That player will be left out of the High In / High Out tiles. Fix it in Roster fixes lower down the page, then press Process again.
Appears in one file but not the other	That player is missing from one of the two exports. They will score zero for that half. Usually means the export was taken before their match was entered.

ROSTER FIXES

Some things are not in the DartConnect export at all, like a missing gender. Set them here once and the site remembers — uploading again next week will not wipe them.

CLEARPROCESS

STEP 3

CHECK IT, THEN PUBLISH

17A + B17—1

PLAYERSDIVISIONSALL NEWCHANGEDWARNINGS

SCORED FROM PER-BAND COLUMNS

Aspen Baum: No gender in the export — set it in the roster or Aspen Baum is left out of the High In / High Out tiles.

MADE A MISTAKE? PUT LAST WEEK BACK

Every upload is kept. If a week goes out wrong, scroll down to **Published history** and press **Restore** next to the one you want back.

STEP 2

DROP THE TWO EXPORTS

DROP THE CRICKET AND '01 CSVS HERE

Either order — each file is identified by its own columns. Or click to browse.

CRICKET

BCDAS_Winter_Spring_2026_all_cricket_leaderboard.csv

'01

BCDAS_Winter_Spring_2026_all_01_leaderboard.csv

The version currently on the scoreboard is marked **Live**. Everything else has a *Restore* button.

One thing to know: Restore puts back an *earlier* version. It cannot remove the very first thing you ever publish for a season, because there is nothing older to go back to. To fix that, just publish the correct files over the top.

QUICK ANSWERS

QUESTION	ANSWER
Do I have to do all three leagues at once?	No. Each league is separate. Do Singles now and Doubles later if you like.
I only have one of the two files.	You can still publish. Players will score zero for the missing half, and you will get a warning for every player. Better to wait for both files.
It says my passcode is wrong.	Check for a stray space at the start or end. If it still fails, ask whoever set up the site — the passcode may have been changed.
I published the wrong week.	Use Restore in Published history, or simply upload the right files and publish again.
Can I do this on my phone?	Yes, if the CSV files are on the phone. A computer is usually easier for finding files.
Someone is missing from the scoreboard.	They were not in the DartConnect export. Check the export, not this site.
The numbers look too low.	Check you picked the right league at Step 2.

Still stuck? Nothing you do on this page can damage the league records — the original files you upload are kept, so any week can always be rebuilt.
